PROFILE

Product-minded AI developer working on safe autonomous rail systems and enterprise AI. A large part of my work is helping people understand what AI can do and put it to use.

EXPERIENCE

Hitachi Rail

Senior AI Developer

Research data science and autonomy systems for trains, with work spanning safe autonomous rail systems, enterprise AI, and AI adoption across technical and enterprise contexts.

EDUCATION

Queen's University

Computer Science

Computer science studies at Queen's University.

SELECTED PROJECT

Hnefatafl

AI · Reinforcement learning · Games

A board-game and reinforcement-learning project originally developed for CISC-856 at Queen's University in winter 2021. Source: github.com/calenirwin/gym-hnef
